PG&E Smart Meter Halt, Review and Ordinance Petition

To: Marin County Board of Supervisors, Steve Kinsey, Susan Adams, Judy Arnold, Hal Brown, Charles McGlashan,

PG&E *has already started* installing an enormous wireless mesh network in Marin County! Utility poles will host the wireless repeater infrastructure to serve the new wireless PG&E Smart Meters, which will be installed in **every home and business!** These devices will add an exponential new layer of radio frequencies (RF) to our homes and environment and will emit RF radiation almost constantly. In light of the lack of FCC safety standards for chronic long term exposure to RF and in light of the of the studies showing adverse health effects and the call for the precautionary principle for wireless technology from global scientists, environmental agencies, advocacy groups and doctors, we, the undersigned, **request you defend democratic choice against the imposition of unelected corporate power** by:

- 1. Thoroughly investigating the PG&E Smart Meter potential health risks of these devices by holding public hearings.
- 2. Requiring PG&E to submit the specific characterization of the Smart Meter system planned for Marin County
- 3. Obtaining the Smart Meter health and safety study PG&E commissioned and make it available to the public.
- 4. Allowing customers to "opt out" of the program by neighborhood and region.
- 5. Halting all new wireless installations until a thorough, *independent* scientific health review, accepted by the community, proves they are safe and without health risk.
- 6. Protecting our privacy from invasion by PG&E selling our data to insurance companies & other third parties.
- 7. Honoring the Marin Community Plan's commitment to the precautionary principle & to protecting Marin's most vulnerable citizens the children, elderly, the electrosensitives, the sick.
- 8. Deactivating the RF function on those already deployed, including infrastructure.
- 9. Protecting Marin citizens with an ordinance banning electromagnetic trespass!
