Background

We presented 7,000 petitions to the San Francisco Japanese Consulate in November of 2011 to plead with their government not to *intentionally* further spread Fukushima radiation by moving the millions of tons of radioactive rubble throughout Japan to be incinerated in places formerly uncontaminated and then dumping the radioactive ash into landfills and into the ocean. Incinerating this debris also can put radiation into the jet stream. [Fukushima Solidarity Movement Grows – A Planetary Issue](http://eon3emfblog.net/?p=3869) <http://eon3emfblog.net/?p=3869> , link to the video on YT: [Fukushima Solidarity in San Francisco](http://youtu.be/dD-tDIQvviw) <http://youtu.be/dD-tDIQvviw> . The video in Japanese translation – with over 15,000 views is [here](http://youtu.be/WFSFDMiWVzU): <http://youtu.be/WFSFDMiWVzU>

The jet stream brings what happens in Japan here about four days later. The radioactive fallout gets into our water, soil, milk and food and certainly influences our own health here in the Bay area and throughout the West Coast (and the rest of the planet.)

The UC Berkeley School of Nuclear Engineering has tested and found elevated levels of deadly radiation in SF Bay area food, milk, soil and water. As recently as mid Feb. elevated levels of Cesium 134 and 137 were detected in Bay Area milk. <http://www.nuc.berkeley.edu/UCBAirSampling/MilkSampling>

The UC Berkeley labs also found elevated levels of radiation in other foods, berries, soil, water, etc. <http://www.nuc.berkeley.edu/UCBAirSampling> We've taken this information to both Senator Feinstein and Senator Boxer and their staffs and have called on them to help.

All four California nuclear power reactors are also on earthquake faults in tsunamis zones!

The cover-ups and lies from the Japanese government and TEPCO in response to the Fukushima meltdowns and explosions is what we can expect to happen here if we had a disaster at one of our nuclear reactors and actually, cover-ups and lies about the leaks and diseases caused by our own reactors have already occurred. Information about the fallout already here is also covered up. Meanwhile our tax dollars are being spent on funding more nuclear reactors.

We have much to gain from acting on this wake-up call to close down our reactors. Join us in the growing **Nuclear Free California** movement to close them down!
